

GSR Industrial Solutions provides a range of specialised services to the mining, shipping, oil and gas, and heavy industry. Our fleet of dedicated vacuum tankers, industrial cleaning equipment and specialised staff provide an expert service to suit your industry requirements. GSR offer a 24 hour call out service to its clients to ensure that business remains productive, with minimal disturbance to their operation.

- Vacuum recovery
- Resource recovery
- Tank cleaning
- Drain cleaning
- Industrial cleaning
- High pressure water cleaning
- Spill response
- Facilities management

HEAVY INDUSTRY APPLICATIONS AND GENERAL INDUSTRIAL CLEANING

General cleaning in heavy industrial applications with the supply of labour for manual cleaning (sheds, rail carriages, manufacturing production lines, boat-ramps, drains and culverts).

Collection and disposal of various waste materials, ores, oil and oily waste products, commercial pool filter waste, lime, cement, barite, drill muds, brines, etc.

CONFINED SPACE ENTRY

Trained and efficient confined space entry personnel that specialise in cleaning of heavy industrial areas; tanks, pits, vessels or carriages.

FACILITIES MANAGEMENT

GSR Industrial Solutions offer businesses a variety of facility management options to suit their individual requirements; physical daily maintenance or scheduled maintenance, long term or short term plant shutdowns, industrial cleaning and management of environmental issues. GSR develop a complete understanding of their clients business needs and goals, providing them with solutions that are implemented into their workplace. We undertake short term projects or long-term on-site management contracts.

We utilise a variety of in-house expertise and specialised subcontractors to ensure your business is operating at its optimum level.

HIGH PRESSURE WATER CLEANING

High pressure water cleaning of various industrial areas; plant and equipment, floor cleaning, degreasing, drain cleaning, building and construction pot holing, and non-destructive hydro-excavation.

INDUSTRIAL VACUUMING

Industrial vacuuming of various wet and dry materials by specialised vacuum tankers provides;

the recovery of ore materials in the mining industry, cleaning of evaporation ponds, transferring of re-usable products, cleaning of conveyor systems, bunds, plant and equipment; cleaning of ship vessels, tanks for alternating product (drill muds, ores and other materials), cleaning of bilge and diesel tanks, degreasing engine rooms; cleaning of rail lines, carriages and cleaning of tankers (lime, cement, oils and other materials).
